

## ***PATHOLOGY, SURGICAL, MEDICAL, HOSPITAL SUPPLIES AND COMMISSIONING.***

Currently we supply all pathology laboratory equipment and disposables, surgical and medical equipment, all hospital supplies to NHS hospitals, Universities, Independent Hospitals and International organisations. We also supply hotel services products and Construction material

We are distributors for products from: John Weiss International, Duck and Kent, Tyco, Smith's Medical, Pearsalls, B Braun, AMS Technia, Huntleigh Medical, Medasil Medical & Surgical, Cambridge Life Sciences, Phoenix Medical, Regent Medical, Kingspan and Fir Italia. As a result we have been able to obtain large volume discounts which are passed on to the client. We generally use UK, EEC and USA manufacturing companies which are accredited to ISO and CE standards or higher. By placing regular orders further discounts can be applied for the client.

Our supplies have relatively long expiry dates and provisions can be made for storing items which are on regular annual contract order but need to be sent in smaller monthly deliveries.

Deliveries in the UK are normally next day by courier; international - depending on the country - two to three days is average. For our international clients we air-freight most goods unless specifically arranged otherwise. All in all delivery will always meet your expectations

We pride ourselves in the quality of products we supply. A through audit is made of the products, prior to being dispatched to the client. You can be rest assured that once the Specification of a particular product is requested it will exceed your expectations

Our involvement in commissioning projects has been in the UK, Kenya, Uganda, Tanzania and Pakistan
